

## Information

Parabit's Telephone kiosks are constructed of vandal resistant materials and are integrated with a telephone and a printed directory. The kiosks serve as an informational assistant for your clients.

Our kiosks are designed in compliance with ADA requirements and can include a telephone directory with Braille.

In many cases cell phone users experience low or no signals, inefficient networks can also leave clients scrambling for information. Keeping these issues in mind, Parabit's Telephone kiosks remain a reliable self-service solution.

## Retail

Parabit's Telephone kiosks serve as a help desk in providing information to the client. You can utilize the front panel of the kiosk to implement branding strategies as well as advertising special promotions. Our kiosks are constructed of metal and can be powder coated to accommodate your branding needs.
